DETAILED ACTION

Note: claim 22 is drafted as a dependent claim, yet has been amended to remove all claim numbers. Hence, it has been restricted as being dependent on claim 4, the first claim number deleted from claim 22.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 21-25, drawn to an ACT1 promoter comprising SEQ ID NO: 9, nucleic acids, vectors comprising the promoter, and host cells comprising the nucleic acid/vector.

Group II, claim(s) 6-10, drawn to an GAP3 promoter comprising SEQ ID NO: 10, nucleic acids and vectors comprising the promoter.

Group III, claim(s) 11-15, drawn to an PMA1 promoter comprising SEQ ID NO: 11, nucleic acids and vectors comprising the promoter.

Group IV, claim(s) 16-20, drawn to an TEF1 promoter comprising SEQ ID NO: 12, nucleic acids and vectors comprising the promoter.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is considered to be a ACT1 promoter comprising SEQ ID NO: 9.

The special technical feature of Group II is considered to be a GAP3 promoter comprising SEQ ID NO: 10.

The special technical feature of Group III is considered to be a PMA1 promoter comprising SEQ ID NO: 1.

Art Unit: 1633

The special technical feature of Group IV is considered to be a TEF1 promoter comprising SEQ ID NO: 12.

According to PCT Rule 13.2, unity of invention exists only when there is a shared same or corresponding special technical feature among the claimed inventions. All the groups are directed towards gene promoters, but each group has a different special technical feature not shared by the remaining groups, as set forth above. For example, Group I has the special technical feature of an ACT1 promoter comprising SEQ ID NO: 9, not shared by groups II-IV, which recite distinct promoters and SEQ ID NOs. Each SEQ ID NO: has a unique structure (i.e. nucleotide sequence), and therefore, function. For example, even upon cursory examination, SEQ ID NO: 9 (1300 bp) does not appear to share significant homology to SEQ ID NO: 10, which is more than double the size of SEQ ID NO: 9 (SEQ ID NO: 10 is 3000 bp).

Accordingly, Groups I-IV are not so linked by the same or a corresponding technical feature as to form a single inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
